# Leaders & Development

## Bold Leadership Starts Here.

Welcome to **The Rewired Leader**, a neuroscience-backed development system that protects the most valuable and most exposed asset in your organization: the capacity of your senior leaders.

At Rewired Global, we've partnered with over 650 leaders worldwide, from C-suite executives and founders to global advisors and senior department heads.

Your best leaders are not struggling with skill. They are carrying a second, invisible job on top of the visible one: tracking every moving part, anticipating what could slip, staying vigilant in every room. The average senior leader carries around 200 hours a year of this invisible cognitive labour. The heaviest carriers reach 700 to 800. It is what quietly consumes the very things you promoted them for: strategic clarity, vision, and the energy to lead from the front.

### **The Rewired Leader equips executives to:**

- Rewire how the brain relates to pressure, so demanding seasons stop consuming them
- Protect the thinking capacity where vision and long-term strategy are built
- Sustain energy that holds through high-pressure quarters, at work and beyond it
- Lead with a presence that cascades across teams, clients, and the wider organization

The best time to do this work is while a leader is performing well. Prevention done early is a renovation. Prevention done late is a rescue, and organizations rarely get to choose the timing of the rescue.

The leaders who will define the future deserve nothing less.

Fernanda Lind

CEO & Founder, Rewired Global

# The Rewired Leader

Executive Immersion

Unblock. Recode. Recalibrate.

A 12-week private leadership immersion for executives carrying enterprise-scale responsibility. This is not coaching as usual, and it is not a wellness perk. It is a precision development experience that expands a leader's capacity at the source: how their brain processes pressure, complexity, and competing agendas. The drive stays. The standards stay. What leaves is the tax: the depletion, the constant urgency, the erosion of strategic thinking that sustained pressure creates. Your leader keeps delivering while the work becomes sustainable.

## What's Included:

- ▶ 12 x 60 min private executive coaching sessions, one-to-one
- ▶ The Rewired Leader 12-week curriculum, tailored to the executive's role, mandate, and context
- ▶ Priority VIP access between sessions for live decisions and high-stakes moments
- ▶ Twice-weekly virtual group coaching calls with a global cohort of senior executives
- ▶ Executive Global Community
- ▶ Lifetime access to the Rewired Executive Toolkit

## Outcomes:

- ▶ A leader protected from burnout while carrying a demanding mandate
- ▶ Restored strategic capacity: room to think, plan, and build long-term vision
- ▶ Energy that lasts through high-pressure seasons instead of draining between them
- ▶ Calm, decisive presence in high-stakes rooms
- ▶ Boundaries that protect performance rather than limit it

*Investment:*

€25,000 EUR

per leader

*Ideal For:*

**High-performing leaders  
carrying heavy mandates.  
The ones your organization  
cannot afford to lose.**

“

***I've been through every top-tier leadership program out there. None delivered the tangible shift that The Rewired Leader did. My clarity, speed of execution, and ability to move the organization forward accelerated immediately. It's the single most valuable investment I've made in my leadership.***

***-Amy G. CEO, USA***

”
